lilike: The Amber Jewel of the Octarchy

lilike (Solomani Rim 1429) is a world defined by its transformation from a fractured, warring landscape into a monolithic industrial powerhouse. Bathed in the heavy golden light of the **K1 III** orange giant **Tau Ceti**, the planet is a sweltering but vibrant cradle for its inhabitants.

A Brief History: The Era of Vasco

- **Settlement (c. 2410 AD):** Settled shortly after the colonization of the Dingir subsector, lilike was originally a chaotic collection of competing corporate interests.
 - **The Unification: Vasco the Conqueror**, a charismatic son of a Terran Federation Admiral and a local lilike banker, utilized high-tech assets to systematically bring the fractured states under a single banner. He oversaw the construction of the **Amber Palace (Historic Executive Office)**, an imposing structure that still dominates the planetary skyline.
 - **The Rise of the Octarchy:** Upon Vasco's death, his eight wives and confidants—brilliant strategists known as the **Matriarchs of lilike**—seized the legislative and judicial apparatus. They formed the **Assembly of Eight**, a Self-Perpetuating Elite Council that has ruled for generations.
 - **The Modern Era:** Today, power passes semi-hereditarily, primarily down female lines. This "Elite" class (SOC 8+) maintains a disciplined, drug-free lifestyle to justify their rule over a society that is otherwise welcoming and open.
-

The Assembly of the Eight (The Octarchy)

Governing from the **Amber Palace (Historic Executive Office)**, the Assembly is a **Self-Perpetuating Elite Council**. Power is semi-hereditary, typically passing to the eldest daughter.

The High Houses (The Wives of Vasco Moreno)

These four houses carry the **Moreno** name, representing the peak of planetary prestige and the core of the monolithic culture.

- **House Beatriz Moreno (The First Wife):** Of Portuguese descent, Beatriz was Vasco's primary political partner. This House manages the **executive bureaucracy** and the **Order of the Amber Wisdom**, focusing on "preserving wisdom" and the world's agnostic traditions.
- **House Sunita Moreno (The Second Wife):** Of Indian descent, this house controls the planet's **industrial core** and the high-tech military manufacturing.

- **House Akari Moreno (The Third Wife):** Of Japanese descent, they oversee **planetary communications and education**, ensuring the cultural "monolith" remains intact despite the world's balkanized past.
- **House Elena Moreno (The Fourth Wife - Fallen):** Of Slavic descent, this house was recently demoted after a failed attempt to monopolize the Radioactives trade. They now oversee the **Wastelands** and hazardous recycling zones.

The Lower Houses (The Concubines)

These houses retain their original surnames, a source of historical friction and "competitive" social friction within the Elite.

- **House Amelia de Vasconcelos:** A Portuguese concubine who founded the **Amelia the 1st Naval Base**. Her house controls the **Amelian Water Navy**, protecting the sub-surface uranium rigs. Promoted to Upper House status in power if not in official rank with the punishment of House Elena
 - **House Anselma Faustino:** Of Spanish descent, this house manages the **Moon Colony (C441432-9)** and interstellar trade logistics.
 - **House Mei-Ling Chen:** Of Chinese descent, they manage the **agricultural arcologies** and the complex native ecosystems.
 - **House Inara Solano:** Of Mexican descent, they are responsible for **Internal Security**, enforcing the strict Level 9 Law across the planet's diverse environments.
-

The Social War of lilike

The Gilded Shackle & The Public Gauntlet

On lilike, the higher your status, the less "human" you are allowed to be.

- **The Biometric Strobe:** When an Elite (SOC A+) triggers their purity band, they don't just get a fine; they become a walking beacon of shame. The strobe and broadcast ensure that everyone within blocks knows a Matriarch's daughter has failed her legacy.
- **Legalized Mockery:** During a violation, the "Undivided Law" effectively suspends protection for the noble. The public is encouraged to vent their frustrations. As long as no blood is drawn and no permanent injury is caused, the insults, "filth-showering," and pranks are legally protected speech. This acts as a societal pressure valve, letting the lower classes mock the powerful.

The Vasco Invitational (The "Wolf-Gala")

These bi-annual events are the most dangerous dates on the planetary calendar.

- **The Sober Predators:** The Matriarchs of the Eight Houses (and their primary heirs) use these parties to display superhuman discipline. They move through clouds of expensive

intoxicants and rooms full of stumbling subordinates while remaining perfectly composed.

- **The Trap:** The "low-rank" elites (SOC 7-9) are the prey. If they can maintain their dignity while indulging, they gain favor. If they slip, the Matriarchs ensure their downfall is documented and publicized.
- **The Sabotage:** The most dangerous part of the Gala is the "In-House" war. Rival houses will use specialized **Novelty Tech** (like contact-based stimulants or aerosolized intoxicants) to try and force a rival's daughter to trigger her Gilded Shackle in the middle of the ballroom.

Sternmetal Horizons: The Corporate Partner

Sternmetal Horizons maintains a massive presence on lilike, often owning the very ground the arcologies sit on.

- **Joint Ventures:** They are the primary partner in the deep-crust **Uranium extraction** process. They provide the specialized TL-C "Mine-ships" and heavy equipment in exchange for exclusive export rights
- **Legal Immunity:** Their "Corporate Zones" are semi-autonomous, which is often where the **Mephistopheles** and other high-risk novelty tech projects are housed.

The Law of the Octarchy

The legal system is **Undivided** and applies to every hex of the system.

Law Type	Level	Reality on the Ground
Civil Law	D (13)	Extremely Restrictive. Every contract, marriage, or trade deal requires Octarchy notarization. A "wrongful gesture" in the Amber Palace can lead to immediate asset seizure.
Criminal Law	B (11)	Harsh. Theft or drug possession (especially for SOC 8+) results in long-term hard labor in the Uranium Barrens.
Weapons	9	Heavy Control. All firearms must be bonded and stored at the starport. Only House-aligned security can carry energy weapons.

Corruption Note: With an overall law score of 9, the bureaucracy is dense. While the system is not "broken," "donations" to the Order of the Amber Wisdom or "gifts" to a House daughter can often fast-track a sluggish permit or clear a minor criminal record.

Criminal Law B: The Uranium Barrens

While the Elites face social ruin, the "common" offenders face industrial slavery. Any person—noble or not—found in a state of public intoxication outside of the sanctioned Galas is subject to **Criminal Law B**.

- **The Sentence:** Usually 1–5 years of "Resource Reclamation" in the **Uranium Barrens**. Because of the **40°C heat** and **10-hour cycle**, this is often a death sentence for those not physically hardened.
-

Environments & Ecosystems

The planet maintains a global average of **40°C** (within the 50°C climate block), allowing for diverse environments despite the thin atmosphere and rapid **10-hour day cycle**.

- **The Steam-Pipe Archipelagos:** With 50% water coverage, the planet is dominated by shallow, mineral-rich oceans. Here, life is fast; the "Pulse-Ray," a native flat-bodied predator, hunts during the 5 hours of daylight by absorbing the star's radiation through its skin before diving into the depths during the 5-hour nights.
 - **The Boiling Troughs:** Located near the deep-sea trenches, these areas are patrolled by the **Amelian Water navy**. These vessels protect underwater harvesting rigs from giant, thermal-vent-dwelling cephalopods that have grown aggressive since the tremors began in 3000. The **Amelia the 1st Naval Base** serves as the headquarters for the **Amelian Water Navy**.
 - **Why a Water Navy?** Despite space-age technology, Ilike maintains a blue-water navy because its primary **Uranium mines** are located on tectonic shelves beneath the waves. These ships protect the submerged rigs from giant, native cephalopods and serve as stable platforms for the heavy equipment required for radioactive extraction.
 - **The Uranium Barrens:** In the high-desert regions, you find the "**Glass-Back Crawlers**," complex organisms that have evolved to process the high-background radiation of the planet's natural ores.
 - **The Atmosphere:** The air is thin but breathable; while a mask is not required, the lower pressure makes physical exertion tiring for those unaccustomed to the world.
-

The Order of the Amber Wisdom

This philosophical order, numbering in the hundreds of thousands, preserves the "wisdom" of the Unification era.

- **Pseudo-Deification:** While the order is **Agnostic**, it has semi-deified Vasco and the Eight Matriarchs as the "Perfect Architects" of their society.
 - **Yearly Worship:** Adherents participate in yearly rituals that involve studying the Unifier's early decrees in a highly informal setting.
 - **The Secular Sanctum:** They act as a cultural anchor, ensuring the **Monolithic** nature of the planet remains intact against outside influence.
-

Traveler Advisory

Ililike is a **Competitive** but **Welcoming** world. Visitors are free to enjoy the arcologies, provided they respect the **Law Level 9** restrictions on weaponry and the extremely strict **Civil Laws (Level D)**.

- **Note:** The moon of Ililike, Anselma, UWP **C441432-9**, is a cool, rocky sentinel that serves as the system's primary industrial and orbital gateway. Home to roughly 10,000 residents, the colony is managed by the lower house, **House Anselma**, which operates the world's high-tech **TL-C shipyards** and handles the logistics for the heavy uranium exports coming off the main planet. Because it lacks the crushing 40°C heat and the rigid "Public Reprimand" laws of the surface, the colony has become a preferred retreat for corporate executives and off-world traders who find the planetary culture too exhausting. Despite its small population, it is a vital strategic asset, housing the long-range sensors that monitor the Tau Ceti system and providing a low-gravity environment for the construction of the massive "Mine-ships" used by **Sternmetal Horizons**.
-

Events of Note

1. The Quadrennial Audit Year

- **The Sternmetal Tightrope:** Sternmetal Horizons is a Federation megacorp with a reputation to uphold across sectors. They aren't just mining; they are "investing in the stability of the Rim." However, the **Assembly of Eight** uses the **Quadrennial Audit** to ensure the corporation doesn't become more powerful than the Houses.
- **The Audit Spectacle:** A House Daughter from the Lower Houses (seeking to elevate her status) is appointed as the **High Inquisitor**. She spends a year digging through Sternmetal's local manifests. If she finds enough evidence of corruption or bribery the Octarchy can levy significant fines.

- **The "Exit" Threat:** This creates a cold war. If the Inquisitor is too harsh, Sternmetal threatens to pull their TL-C Mine-ships and leave Ilike's economy to collapse. If the Inquisitor is too soft, she is seen as a corporate puppet and her House loses standing.

2. The Audit Year "Paperwork Trap"

- **Administrative Snaring:** During an Audit, "House Inara" patrols the starports looking for "**Wrongful Gestures**"—legal slang for minor technical errors in ship docking or cargo labeling.
- **The Penalty:** A player with a minor typo on a manifest might find their ship impounded not for "crime," but for a "Civil Reconciliation." To get the ship back, they might have to perform a "service" for the Inquisitor—perhaps retrieving "lost" Sternmetal data that the corporation is trying to hide from the Audit.

3. The "Vasco Moreno" Legacy (The Unifier's Shadow)

- Vasco's name remains the ultimate shield. Every legal decree starts with: *"By the Wisdom of the Unifier and the Grace of the Eight..."*
- **Historical Fact:** The **Amber Palace** contains the "Vasco Vault," which purportedly holds the original hand-written diaries of the wives and concubines, detailing how they truly felt about the Unifier—a document that many would kill to possess (or destroy).

TAS ENTRY: IILIKE (SOL 1429)

IILIKE (Solomani Rim 1429)

Amber Jewel of the Octarchy

Iilike is a hot, industrialized world orbiting an orange star, notable for its unified planetary government—the **Octarchy**—and its strict, highly ritualized legal system. Visitors will find modern arcologies, extensive offworld trade, and an unusually formal social order.

Government & Law

Iilike is ruled by the **Assembly of Eight**, a self-perpetuating elite council descended from the companions of its Unifier, Vasco Moreno. Civil law is extremely strict, particularly regarding contracts and public conduct. Criminal penalties are harsh but predictable.

Visitors should note:

- All firearms must be bonded and stored at the starport
- Drug possession and public intoxication are illegal
- Administrative violations may result in ship impoundment

Society

The local elite maintain a public lifestyle of extreme discipline. Social violations by nobles are punished through ritualized public shame rather than imprisonment. Common citizens face conventional criminal penalties.

Public mockery of nobles is legal *only* during officially recorded violations.

Trade & Industry

Iilike is a major exporter of refined radioactives. Sternmetal Horizons maintains extensive operations under joint agreement with the Octarchy. Audit Years (every four years) may disrupt shipping and customs.

Advisory

Iilike is competitive but welcoming to offworlders who respect local customs and documentation requirements. The nearby Moon Colony operates under a separate charter and offers a more relaxed atmosphere.

Notes: Excellent refueling and repair facilities. Expect inspections.

PLOT HOOKS

1. The Silent Strobe

A House Daughter's purity band activates in a **semi-private space**—a restricted lounge, corporate shuttle, or starport protocol suite.

- The violation is minor.
- The witnesses are few.
- The recordings *already exist*.

She needs to:

- Be extracted *before* House Inara registers the strobe
- Have all recordings destroyed or corrupted
- Reappear somewhere plausible (Moon Colony, corporate medical wing)

Complications:

- A rival House wants the footage leaked
- The daughter may have been *set up* using novelty tech
- Sternmetal legal teams are already flagging anomalous data traffic

Failure doesn't mean arrest—it means **erasure from history**.

2. The Earth Doesn't Lie (But Data Does)

Sternmetal Horizons hires the PCs to falsify seismic readings proving that **seawater injection mining** is *not* causing tectonic instability.

The truth:

- The injections *are* worsening tremors
- The Octarchy already suspects it
- The next quake could destroy a submerged rig—or a city shelf

PCs must:

- Alter data without triggering Audit algorithms
- Decide how much falsification is “safe”
- Possibly scapegoat a rival House's monitoring station

Twist options:

- The quakes are awakening something in the deep trenches
 - The falsified data will be reviewed by a House Daughter seeking promotion
 - If Sternmetal pulls out, millions starve—*and the PCs get blamed*
-

3. The Vasco Vault Fragment

A partial copy of Vasco's diaries surfaces—only a few pages, but explosive.

They imply:

- One of the Eight Matriarchs opposed the Unification
- The Octarchy was *not* Vasco's intended legacy
- A current House descends from a wife, not a concubine

Everyone wants it:

- The Order of the Amber Wisdom wants it “corrected”
- A Lower House wants elevation
- Sternmetal wants leverage
- The Assembly wants silence

The PCs are the only ones not sworn to a House.
